# HYBRID BEAST - PHOTOSHOP STEPS

VECTOR MASK:

• Open your image in Photoshop

  • Drag both Files onto Photoshop Dock Icon or Control click, Open with> Photoshop on image to open.

• Click on animal photo tab.

  • Click the "Add Vector Mask" button in your layers window.

  * you should have a white layer1 appear next to your animal head layer.

  • On your tool bar select Paintbrush Tool

• Make sure your paint colors are Black and White

  • Initially make your brush have a HARD edge.

  • *Once you get closer make your brush SOFT to get any hairs

  • Toggle between White and Black to add or subtract (respectively) from image

  ✳Remember to keep neck and shoulders for fade.

• Burn and Doge final for shadows.

SEPIA TONE:

  • Select "create new fill or adjustment layer"

  • First select "Black & White"

  • Then Select " Photo Filter" Play with the warming filters

SAVING:

• File > Save As > YourName beast.psd (photoshop format)
• in your server folder
• &
• in the turn in folder

PRINT:

• File > Print > A6 > Scale to fit media
